ENAI

Network Engineer

ENAI
A safe and comfortable life

For professional service providers, we are happy to be the knowledge partner in continuity with solutions without having to worry about anything. We ensure that our customers can fully focus on their services. And in the background, we like to ensure that all information & systems are always available in a secure manner.

We supply the ENAI service platform for managed services. Our solutions are currently often used by professional service providers in the security industry.

We always see opportunities in connecting, interpreting and/or presenting information sources, making it possible for professional service providers to act not only reactively, but also proactively on valuable information.

With you, things get better! Will you join our team?

We are looking for medior/senior Network engineers who want to manage and further develop the network environment of our customers. It appeals to you to carry out both changes and implementation & migration projects. This in the various phases from design to implementation.
